

Oliver Razum (Prof., Dr. med., MSc) is a medical doctor and epidemiologist by training. Oliver is dean of the School of Public Health, Bielefeld University, Germany. His work is in social epidemiology with a focus on refugee/migrant health, as well as on Global Health. Oliver has been representing Bielefeld School of Public Health at ASPHER since 2006, initially as associate dean of academic affairs, since 2012 as dean. He has been actively engaged in ASPHER's work on refugee health, see Razum, O., Barros, H., Otok, R., Tulchinsky, T. H., & Lindert, J. (2016). ASPHER Position Paper on Refugee Health. *Eurohealth*, 22(4), 36–38. Retrieved from <http://www.euro.who.int/en/about-us/partners/observatory/news/news/2016/12/new-eurohealth,-aspher-50th-anniversary-special-issue>.

As ASPHER EB member, Oliver would continue his engagement for the health needs of migrants, and in particular of refugees. Key concerns are safe passage and access to health care during transit; EU immigration laws; entitlement and access to health care; tackling root causes; and education and training in refugee health.

For an overview of Oliver's other research work see
